

Infrared Gas Heater

Widest range of gas heating equipment for applications in the poultry

Features and benefits

- Low maintenance safety and reliable
- Stainless steel surface
- Washable with air pressure or water
- Quick heat-up time
- Return of investment in just a few number of heater
- High energy efficiency: up to 30%-40% energy savings compared with conventional system
- Lightweight easy to shift at any place

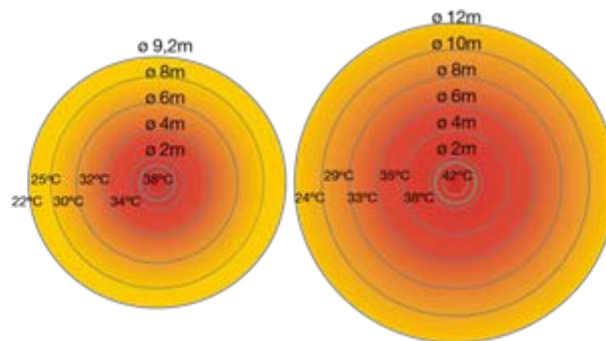

Description

AFEM offers the market the widest range of gas heating equipment for applications in the poultry farm, infrared heating devices, are a guarantee of the highest quality and the solution to obtain the best results in your livestock operation. Significant gas savings of up to 40% compared to air heating systems and conventional radiators. A typical application in raising chickens, turkeys, quail, etc.

Technical features

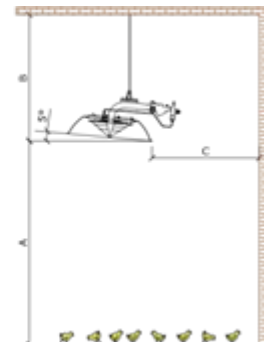

Features:	10BP
Capacity (kW)	1, 15 / 10
Propane gas (g/h)	85 / 722
Consumption	0,095 / 0,819
Working pressure (mbar)	20 / 30
Minimum distances recommended	10BP
A	2, 00
B	0, 75
C	2, 50
Coverage in number of animals (*)	10BP
Broilers	2500 / 3000
Turkeys	975
Ducks	860

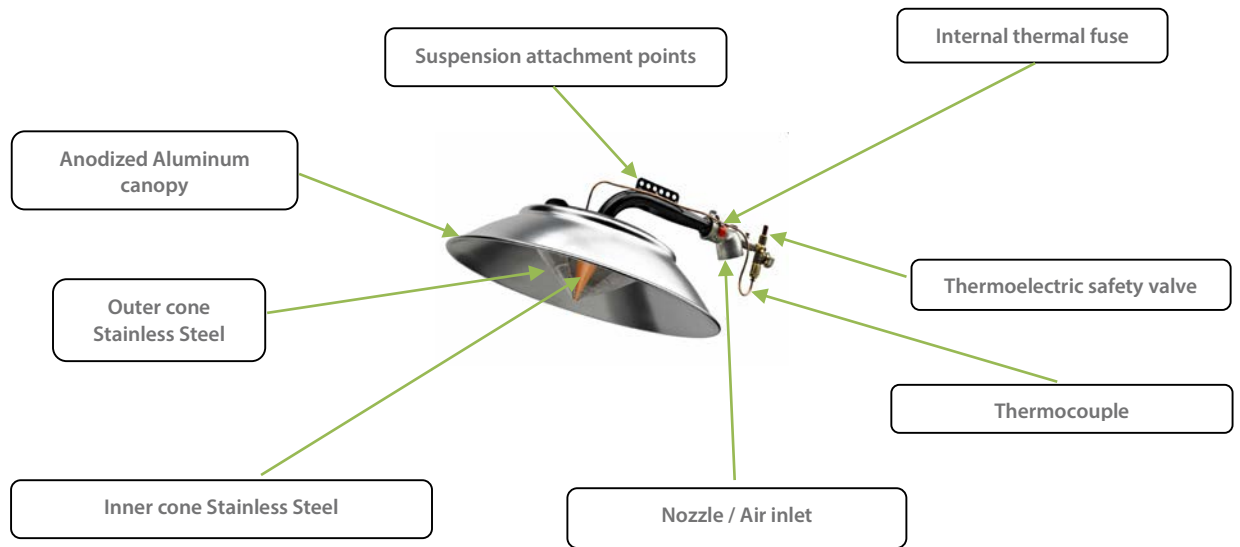

Average temperatures obtained under ideal conditions, with a air

temperature close to 22 °C.
